SOLO Energy Mission:

**Deliver clean, cost-effective, highly
reliable on-site power generation**

We sell solutions, not hassles

We deliver services, not boxes

Customer Focused Solutions

- **No up front investment**
- **No technology risk**
- **Predictable, fixed rate pricing**
- **No fuel risk**
- **Installation and maintenance included**

Why?

- **Cost**
- **Price Volatility**
- **Reliability**

Wireless Energy™ Technology

100 kW Reciprocating Engine

- Commercially available now
 - Peak efficiency >30%
 - Less than 5ppm NOx emissions
 - Load following
 - Off grid operations and ***fast*** start up capabilities
 - Remote monitoring and control
-
- **23 machines commercially deployed**
 - **>50,000 operational hours in the field**
 - **Third party verification of *low* emissions, *high* efficiency and output**

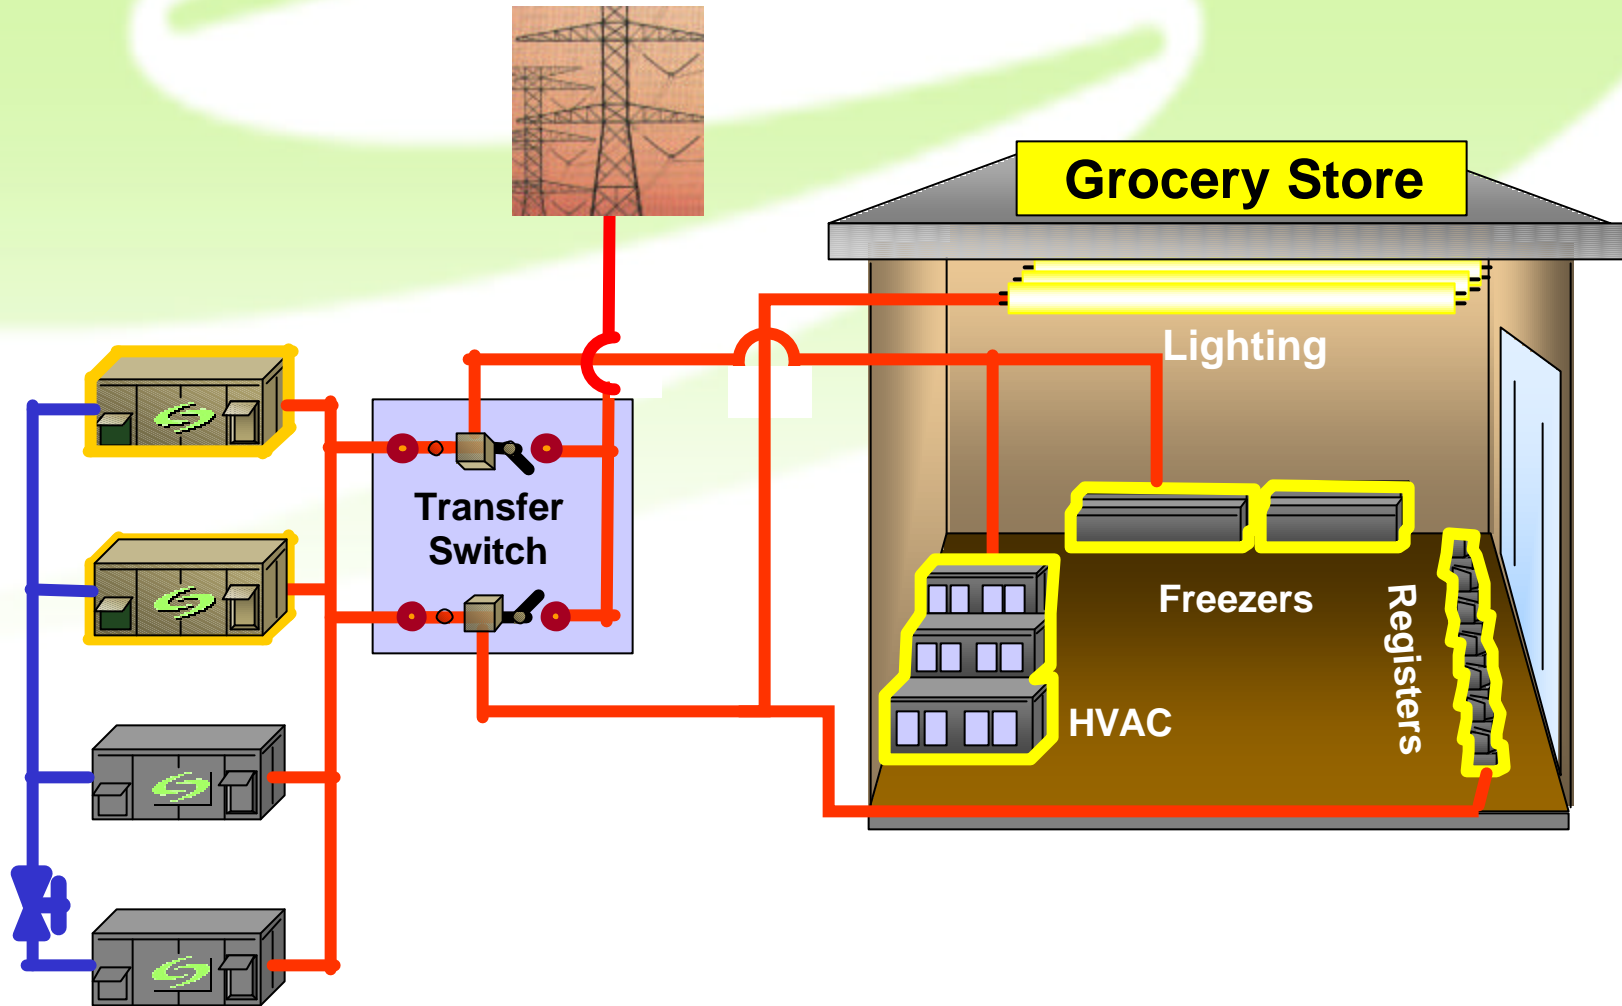

Wireless Energy™ Technology

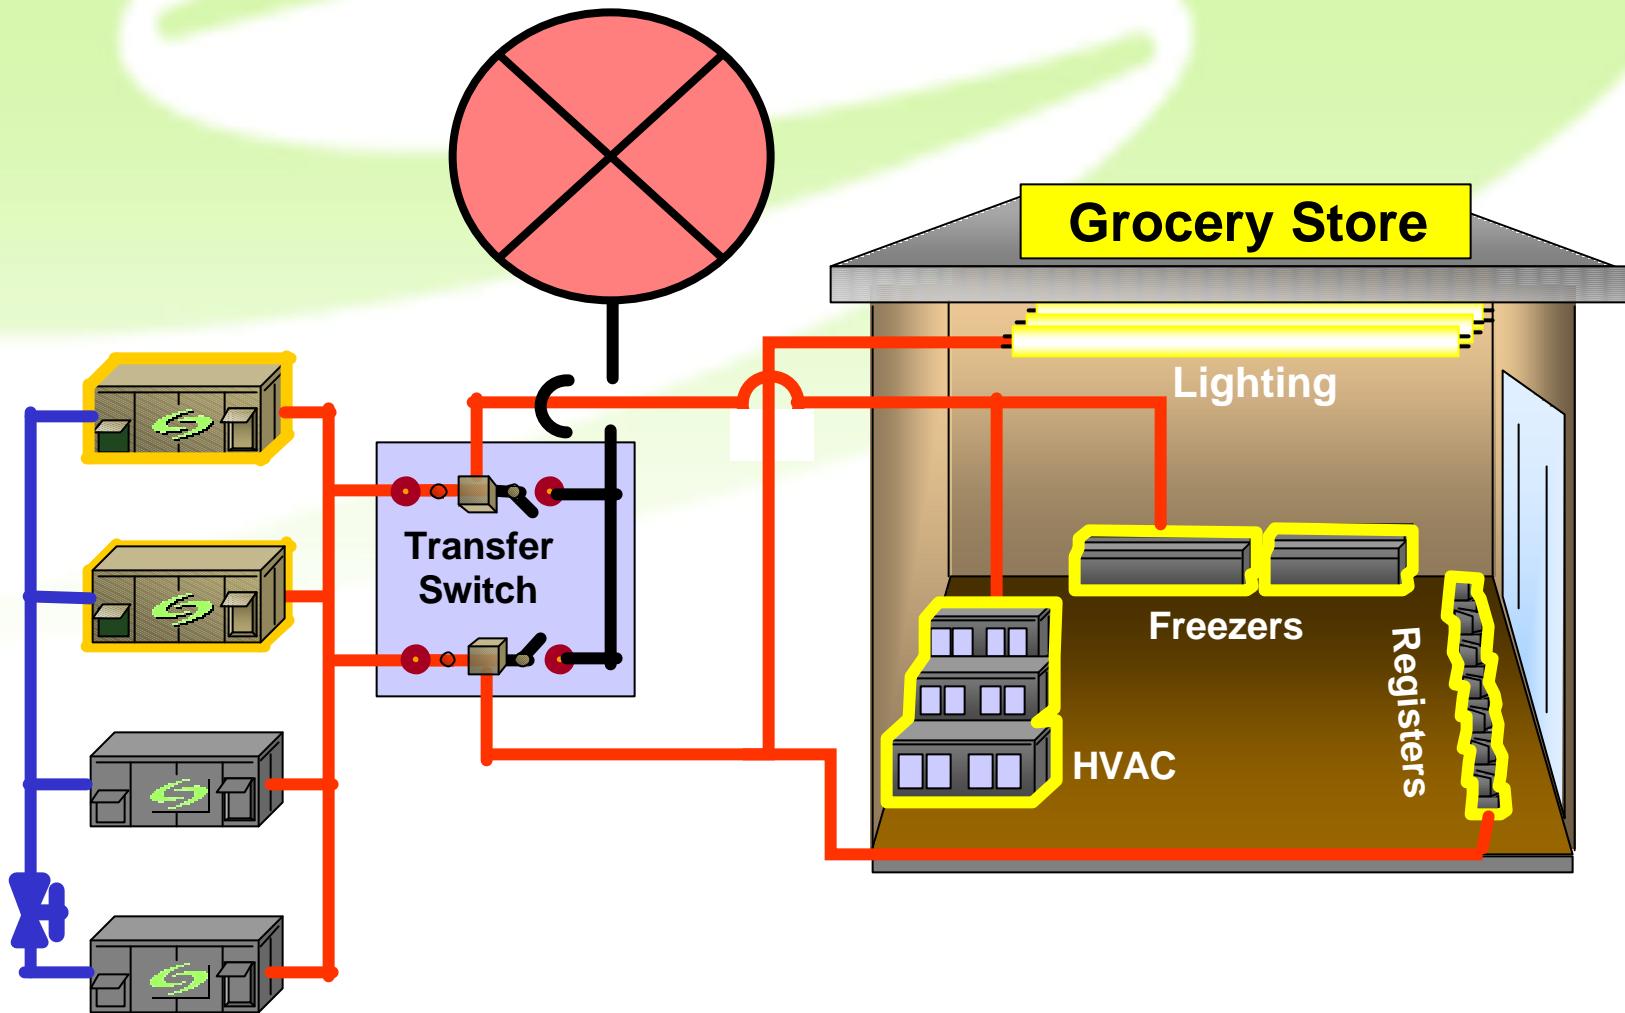

90 kW Microturbine

- Superior efficiency
- Less than 1 ppm NOx emissions
- Less than 10 ppm CO and UHC
- Operates on line pressure gas
- Off grid operations and start up capabilities
- Remote monitoring and control

Technology Designed for the Mission

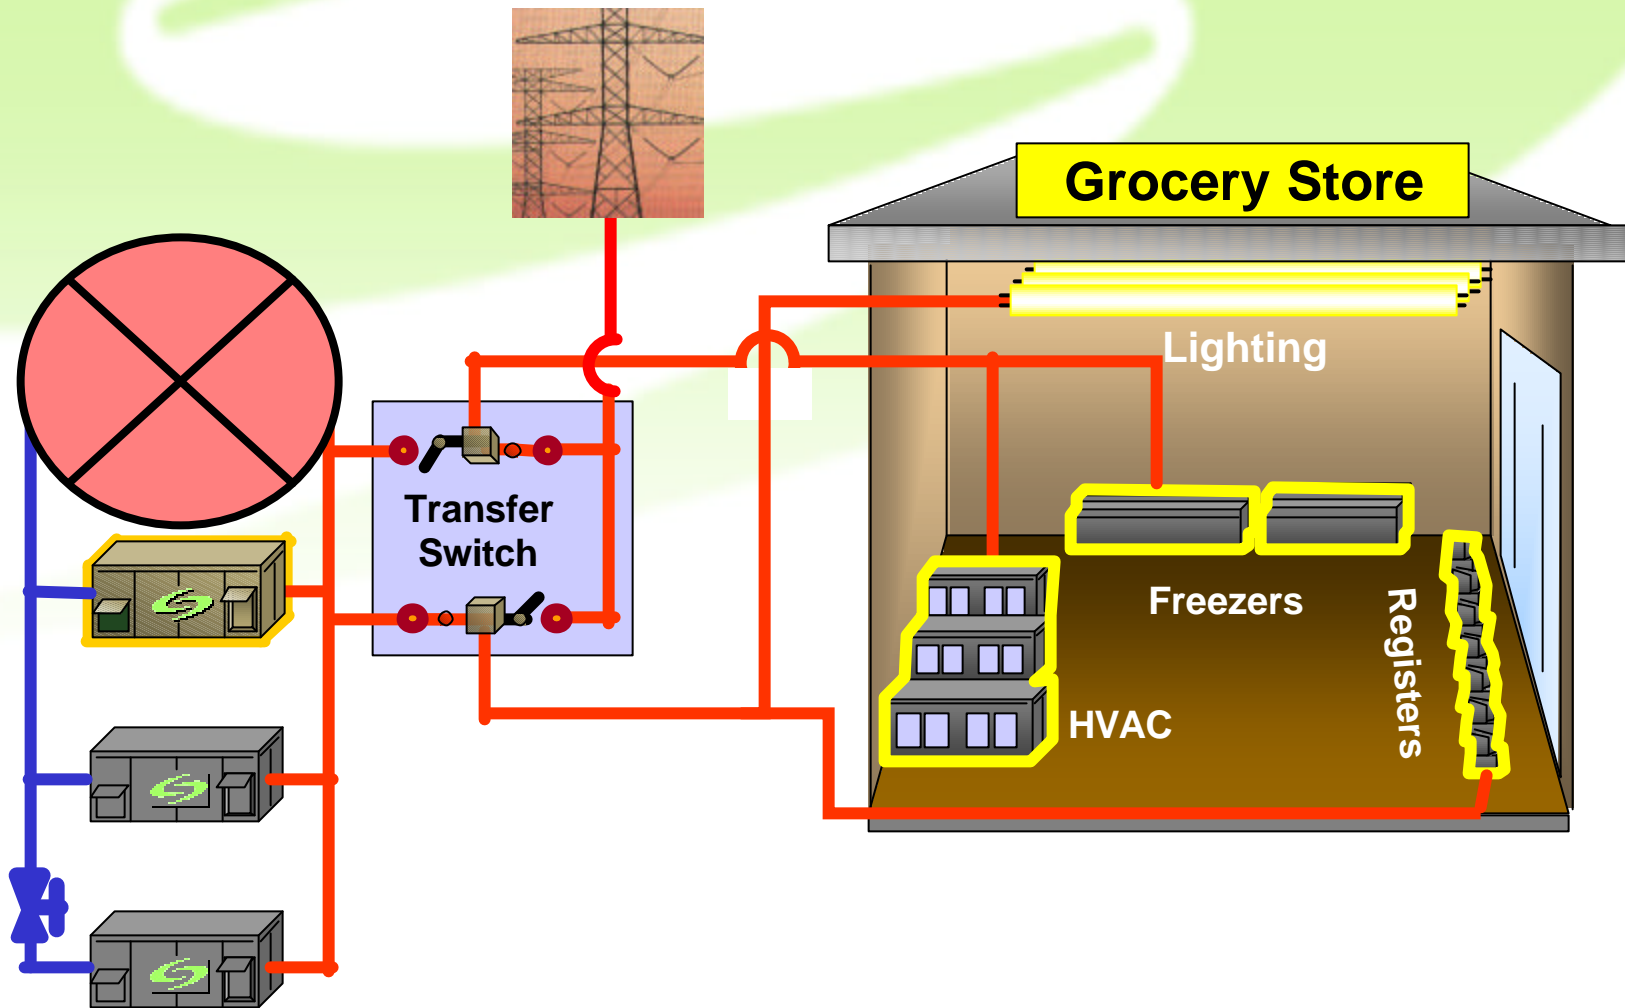

Technology Designed for the Mission

Entire load supplied by Solo onsite

Technology Designed for the Mission

Grid supplies backup for portion of load

SOLO ENERGY CORPORATION

Needs of a DG Power Company

- Needs of a DG Power Company
- *Solo Energy Inc, 2701 Monarch St. Alameda CA 94501; 510-864-3040*
- ~ 200kW at 30 to 45% efficiency
- NOx < 9ppm at 15% O₂
- CO < 80 ppm NMOG < 35ppm
- Noise < 60db at 30 feet
- Nat Gas supplied at 7 in. of water, no gas compressor
- Low Installed cost
- Stand Alone Continuous Power; Grid Compatible
- Overhaul > 30,000 hours
- Spark plugs and oil > 2,000 hours

These Goals are Reachable
